

# ETC® Assembly Guide

## PAR XWFL Lens Kit

### Overview

When the XWFL lens (PN 7061A1042) is used in a Source Four PAR, the lens must be equipped with four Tinnerman clips (PN HW8203), which are installed at the factory. The clips do not interfere with the light beam.

If the clips are removed, follow the illustration below to reinstall them.

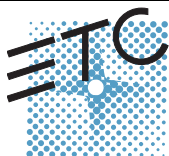

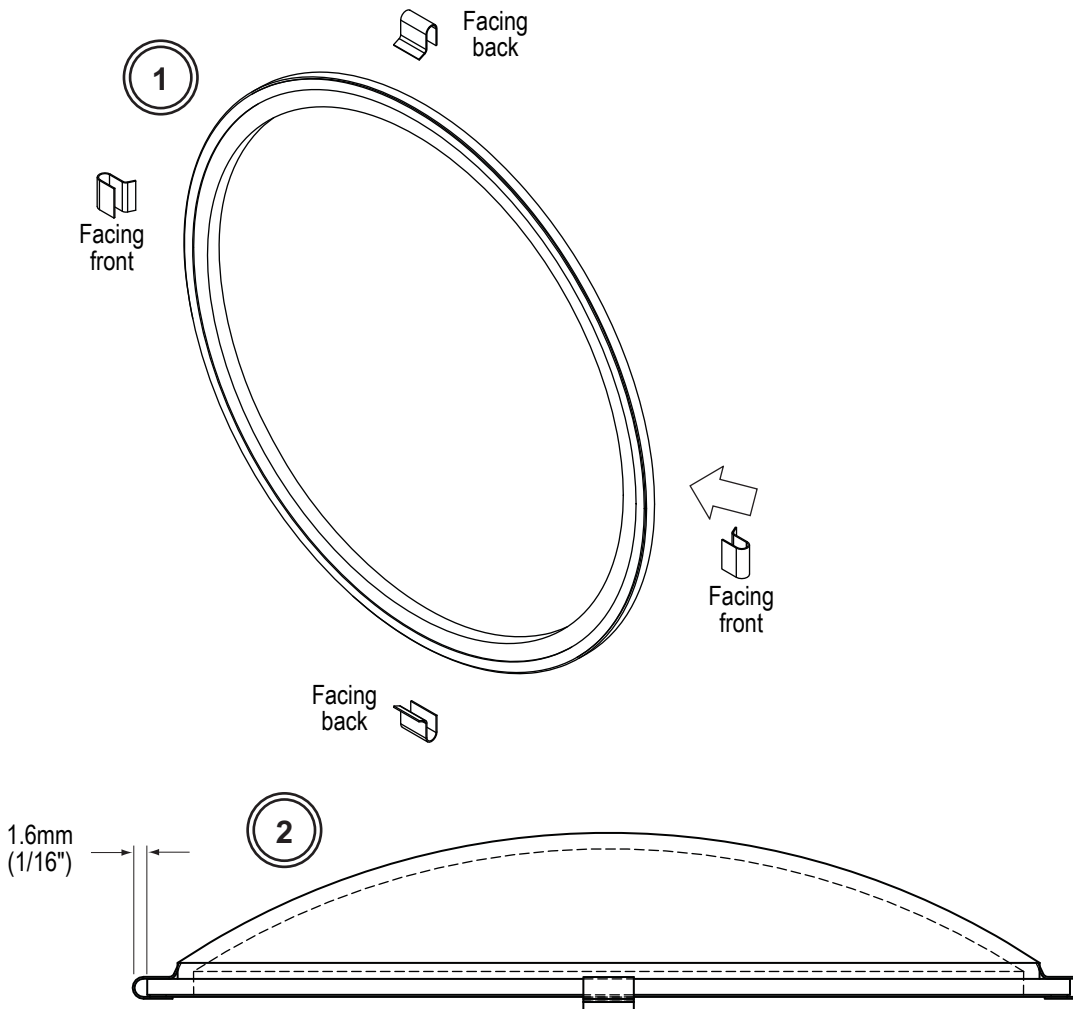

### WARNING

*The XWFL lens is approximately 3.2mm (1/8 inch) smaller in diameter than the NSP-WFL lenses shipped with the EA and MCM PARs. The clips provided with the XWFL lens must be used to secure it safely in the lens ring. Failure to observe this warning could result in serious injury.*

### Note:

*The clips must be installed 90° apart and so that every other one is facing the back of the lens.*
